PROJECTS

WanderMind — AI-Driven Full-Stack Travel Platform [Live Demo](#) | [GitHub](#)

A production-grade, full-stack travel platform powered by AI. Built with a microservices-inspired architecture featuring real-time notifications, 5 AI-powered features, multi-role dashboards, and a complete booking lifecycle.

Tech Stack: TypeScript, Next.js 16, Express 5, PostgreSQL, Prisma, Redis, OpenAI API, Socket.io, BullMQ, JWT, Google OAuth, Cloudinary, Zod, Shadcn UI, Tailwind CSS

- Architected a full-stack travel platform with REST API modules, Socket.io real-time notifications, and role-based access control (Traveler / Host / Admin); deployed on Render and Vercel.
- Integrated OpenAI GPT-4o-mini to power 5 AI features: Itinerary Builder, Smart Packing List, Budget Analyzer, Journal Summarizer, and a Destination Discovery Chatbot with structured JSON responses.
- Built a complete experience booking lifecycle (Pending → Confirmed → Completed), Redis caching, BullMQ background jobs, and an Admin Panel with platform analytics.

CineTube — Full-Stack Movie Streaming & Subscription Platform [Live Demo](#) | [GitHub](#)

A full-stack movie rating and subscription platform where users explore movies, manage watchlists, and unlock premium content via a Stripe-powered payment system.

Tech Stack: TypeScript, Next.js, Node.js, Express.js, PostgreSQL, Prisma, JWT, Stripe, Cloudinary, Zod, Shadcn UI, Tailwind CSS

- Built a Stripe-powered subscription system with admin analytics dashboards, JWT authentication, and Cloudinary image uploads.
- Developed category-based movie browsing with a smooth slider UI, detailed movie pages (ratings, cast, trailers), and full watchlist management.
- Created an Admin Dashboard for media/user management and implemented robust error handling across frontend and backend.

SkillBridge — Full-Stack Online Tutoring Platform [Live Demo](#) | [GitHub](#)

A tutoring marketplace connecting students with expert tutors via smart search, availability-based booking, and role-based dashboards for Students, Tutors, and Admins.

Tech Stack: TypeScript, Next.js, Node.js, Express.js, PostgreSQL, Prisma, BetterAuth, Zod, Shadcn UI, Tailwind CSS

- Designed normalized PostgreSQL schema with Prisma for users, bookings, profiles, and reviews; implemented BetterAuth with role-based middleware for three dashboards (Student / Tutor / Admin).
- Built a complete booking management system with availability checking, session scheduling, status tracking (Confirmed/Completed/Cancelled), and booking history.
- Developed advanced tutor search supporting subject, rating, price range, and category filters; integrated star ratings and review system to enhance tutor credibility.
