Projects

Cinetube - Full-Stack Movie Rating Platform

<https://github.com/sadik117/L2-A5-cinetube-frontend>

<https://cinetube-universe.vercel.app>

CineTube is a modern movie streaming and subscription platform where users can explore movies and add reviews with ratings and like, comments, manage watchlists, and unlock premium content through a seamless payment system.

Tech Stack: TypeScript, Tailwind CSS, Next.js, Node.js, Express.js, PostgreSQL, Prisma, JWT, Stripe, Cloudinary, Zod, Shadcn UI

- Browse movies by categories with a smooth slider UI.
- Add reviews and comments, and like ratings.
- Add or remove movies from the watchlist.
- Create detailed movie pages with ratings, cast, and trailers.
- Implement a secure authentication system.
- Develop a Stripe-powered subscription system.
- Create an admin dashboard to manage media and users.
- Provide subscription analytics with charts.
- Enable Cloudinary image uploads.
- Implement robust error handling on both frontend and backend.

SkillBridge – Full-Stack Tutoring Platform

<https://github.com/sadik117/L2-A4-skillbridge-frontend>

<https://skill-bridge-connect.vercel.app>

Developed SkillBridge, a full-stack online tutoring platform that connects students with expert tutors using smart search, availability-based booking, and role-based dashboards for Students, Tutors, and Admins.

Tech Stack: TypeScript, Tailwind CSS, Next.js, Node.js, Express.js, PostgreSQL, Prisma, BetterAuth, Zod, Shadcn UI

- Utilized PostgreSQL with Prisma for efficient data modeling and relationships between users, bookings, profiles, and reviews.
- Implemented secure Better Auth authentication and authorization middleware for role-based route protection.
- Implemented role-based dashboards with tailored features: students can browse and book tutors, tutors manage availability and sessions, and admins oversee users and bookings.
- Developed advanced tutor search and filtering functionality supporting subject, rating, price, and category-based discovery.
- Created a complete booking management system including availability checking, session scheduling, status tracking (Confirmed, Completed, Cancelled), and booking history.
- Designed the Tutor Profile module enabling tutors to showcase qualifications, set hourly rates, and manage time availability slots.
- Integrated a student review system with star ratings and comments to enhance tutor credibility and platform quality.
- Built an Admin Panel to manage users, moderate content, view analytics, and handle platform-wide operations.

Local Market Tracker – MERN Stack Daily Price Tracking

<https://github.com/sadik117/kacha-bazar-tracker-client-side>

<https://kacha-bazar-tracker.netlify.app>

A full-stack MERN web application for tracking daily prices across various markets.

Tech Stack: JavaScript, Tailwind CSS, React.js, Node.js, Express.js, MongoDB, JWT Authentication, React Hook Form

- Daily Price Tracker for Local Markets is a full-stack MERN web application that helps users track daily product prices from different markets
- Role-Based Dashboard: Separate dashboards for Admin, Vendor, and User with tailored features
- Product & Price Management: Vendors can add/update products with price history, while users can compare prices across markets
- Watchlist & Orders: Users can maintain a watchlist, make purchases via Stripe, and track order history
